

## Centres – Feuilles de route – Corrigé

Les solutions vont varier.  
Voici un exemple de solution :

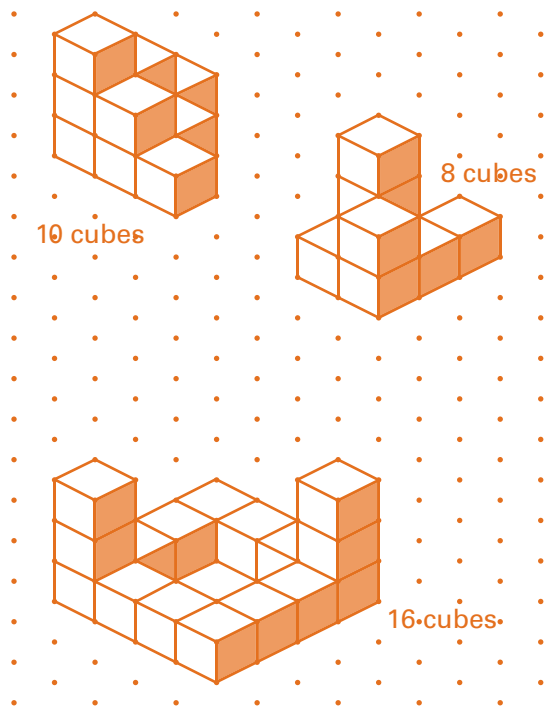

Les solutions sont multiples.  
Les fiches des élèves peuvent servir de fiches à résoudre pour la classe. Les photos peuvent servir de clé de solution.

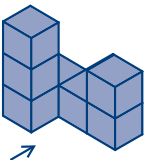

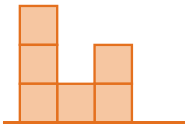

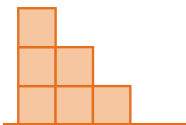

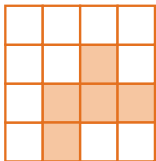

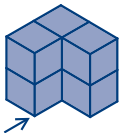

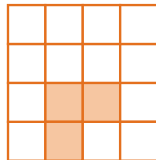

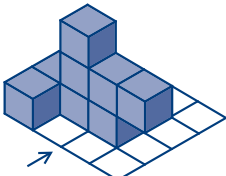

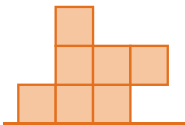

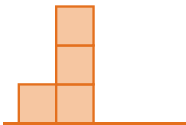

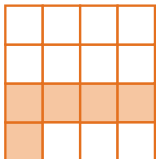

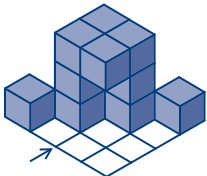

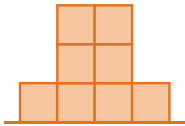

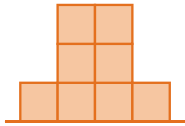

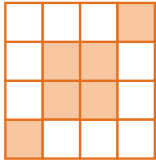

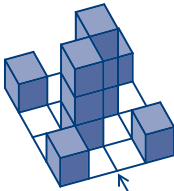

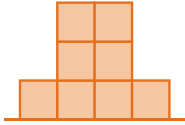

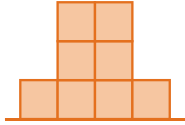

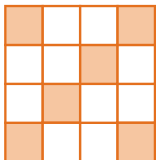

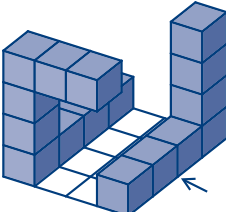

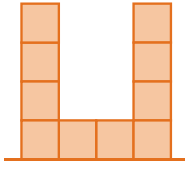

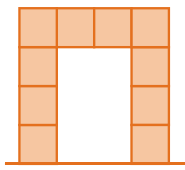

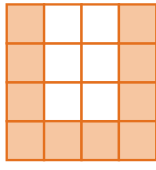

## Activité 10

L'angle des représentations  
va varier.  
Voici un exemple de solution :

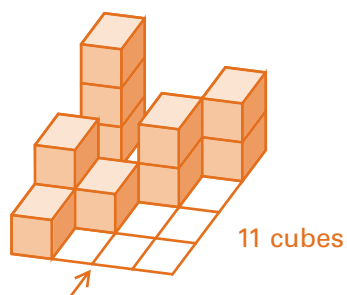

| Structure | Vue de face | Vue de côté | Vue de dessus |
|-----------|-------------|-------------|---------------|
|           |             |             |               |
|           |             |             |               |

| Structure                                                                           | Vue de face                                                                         | Vue de côté                                                                          | Vue de dessus                                                                         |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|    |    |    |    |
|    |    |    |    |
|   |   |   |   |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

## Activité 10

**A**  
11 cubes

**B**  
26 cubes
